The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasise the fact that they are used for single letters only in Serbian.

'Shch' and 'sht' invariably represent the letter III, in Russian and Bulgarian, respectively, since the pairs of letters (IIIh in Russian and IIIT in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet 'The transliteration of Russian, Serbian and Bulgarian for bibliographical purposes' published by the Royal Society, Burlington House, London W1 (February 1953, price 5p.). It represents the system at present in use in Science Abstracts for the transliteration of the names of journals and the names of authors of articles abstracted.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6" × 4") cards.

TOPICS

This is an SDI service based on standard profiles. There are over 70 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

IEE Telecommunications Series

Published by Peter Peregrinus Ltd. on behalf of the Institution of Electrical Engineers

1 Telecommunication networks

J. E. Flood (Ed.)

This volume describes the characteristics of national telecommunication networks and develops methods for new planning. To explain the planning methods used, sufficient background is given in transmission, switching, traffic, engineering economics and modelling and these are illustrated by case studies. The book deals mainly with telephone networks; however chapters on telegraphy, data transmission and mobile radio are included.

432 pp., 234 x 156 mm, 138 diagrams, casebound, 1975, ISBN 0 901223 65 4, UK £12.60, Americas $30.00, elsewhere £14.75.

2 Principles of telecommunication traffic engineering

D. Bear

This volume deals with the mathematical theory of traffic distribution and congestion in telecommunication networks, and its application to the engineering of switching systems. Subjects covered include traffic measurement, traffic prediction and simulation, lost-call theory, waiting-call systems and non-blocking networks.

220 pp., 234 x 156 mm, 58 diagrams, casebound, 1975, ISBN 0 901223 75 1, UK £11, Americas $26.00, elsewhere £12.90.

3 Programming electronic switching systems

M. T. Hills and S. Kano

Following a discussion of the main programming techniques used for the control of switching systems, this volume describes the attributes needed for a suitable language. Subjects covered include an introduction to s.p.c. systems, principles of programming s.p.c. exchanges, characteristics of telecommunication programming and languages features and their relevance to telecommunication programming.

207 pp., 234 x 156 mm, casebound, ISBN 0 901223 80 8, March 1976, UK £11.90, Americas $28.00, elsewhere £13.90.

4 Digital transmission systems

P. Bylanski and D. G. W. Ingram

A comprehensive view of the transmission aspects of communication systems using digital techniques is presented in this book. There is an emphasis on systems and technology that have found acceptance in the communication industry or are likely to become significant in the future.

368 pp., 234 x 156 mm, casebound, ISBN 0 901223 78 6, April 1976, UK £13.80, Americas $32.00, elsewhere £16.00.

5 Angle Modulation—the theory of system assessment

J. H. Roberts

This volume covers the performance of threshold-extending devices, the phase-lock loop (in both its analogue and discrete forms), spectra, the distortion introduced by first filtering an analogue f.m. signal and then demodulating it, and variants on the conventional f.m. receiver that improve very poor signal/noise ratios.

288 pp., 216 x 138 mm, casebound, ISBN 0 901223 95 6, May 1977, UK £12.75, Americas $30.00, elsewhere £14.90.

6 Elements of Telecommunications Economics

S. C. Littlechild

The modern manager in telecommunications must be familiar with pricing and finance, cost and demand, regulation and 'political' economy. This book introduces the non-specialist to the whole range of economic work in telecommunications and offers material, grouped by topic, with illustrations from a variety of countries.

280 pp., 216 x 135 mm, 37 diagrams, casebound, October 1979, ISBN 0 906048 17 6, UK £11.50, Americas $30.50, elsewhere £13.50.

7 Software for stored-program-control switching systems

S. Takamura, H. Kawashima, H. Nakajuina
and M. T. Hills (translation editor)

Making the best use of stored program control is the ultimate objective of introducing an electronic switching system into a telecommunication network. This book explains the latest D 10 programs, laying emphasis on their development rather than how they are presently programmed. This approach clarifies the nature of stored program control, and how programs should be designed and maintained to make the best use of it.

256 pp., 216 x 135 mm, 155 diagrams, casebound, October 1979, ISBN 0 906048 18 4, UK £12, Americas $31.50, elsewhere £14.00.
